DETAILED ACTION

Response to Amendment

1. This office action is in reply to Applicant's Response dated July 23, 2010.
2. **Claim 2-8 and 10-13** has been cancelled.
3. **Claims 1, 9, 18 and 19** have been amended.
4. **Claims 1, 9, 14-19** are still pending.

Response to Arguments

5. Objection to Drawing is withdrawn because new drawing and specification overcomes the previous objections.
6. Rejection of claim 1 under 35 U.S.C. under 112 second paragraph is withdrawn because amendment of claim overcomes the previous rejection.
7. Applicant's arguments with respect to the prior art rejection over **claims 1, 9, and 14-18** are persuasive and are in the condition of allowance.
8. Regarding **claim 19**, it is a computer readable medium claim. The specification discloses "computer readable medium is defined as CD-ROM, Floppy Disk, DVD or **the like**" (pp.33, line 16-20). However, "the like" can include transitory medium such as signal. Therefore, it is rejected as non-statutory under 35 U.S.C. 101.

Claim Rejections - 35 USC § 101

9. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

10. **Claim 19** is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

11. Regarding **claim 19**, it is a computer readable medium claim. The specification discloses "computer readable medium is defined as CD-ROM, Floppy Disk, DVD or **the like**" (pp.33, line 16-20). However, "the like" can include transitory medium such as signal. Therefore, it is rejected as non-statutory under 35 U.S.C. 101.

Allowable Subject Matter

12. **Claims 1, 9, and 14 -18** are allowable.

Independent claims 1 and 18 recite "...the parallax information being presented in a horizontal direction of the two-dimensional image display_screen; and a viewing position displacement detecting unit that detects a viewing position displacement amount in the vertical direction of the two-dimensional image display screen, the viewing position displacement amount being a displacement amount between a viewing position on which a three- dimensional image displayed on the three-dimensional image display device is to be observed and an actual position of an observer; a viewing zone shift amount determining unit that determines a shift amount of the parallax information in the vertical direction based on the viewing position displacement amount; and a viewing zone adjusting unit that shifts the parallax information disposed on each pixel of the two-dimensional image display screen in the vertical direction by the shift amount..." which are features that are not

anticipated nor obvious over the art of record. **Dependent claims 9 and 14-17** are dependent on the allowable claim 1, therefore they are allowed too.

13. **Claim 19** would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 101, set forth in this Office action.
